

# How to View and Save Your Web App

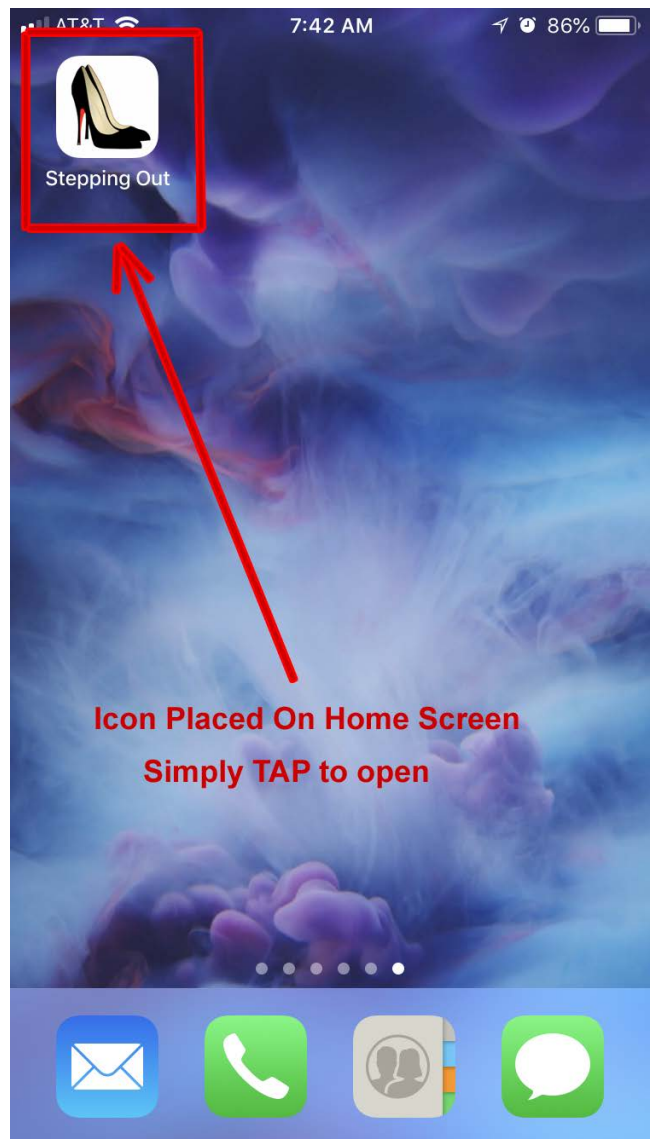

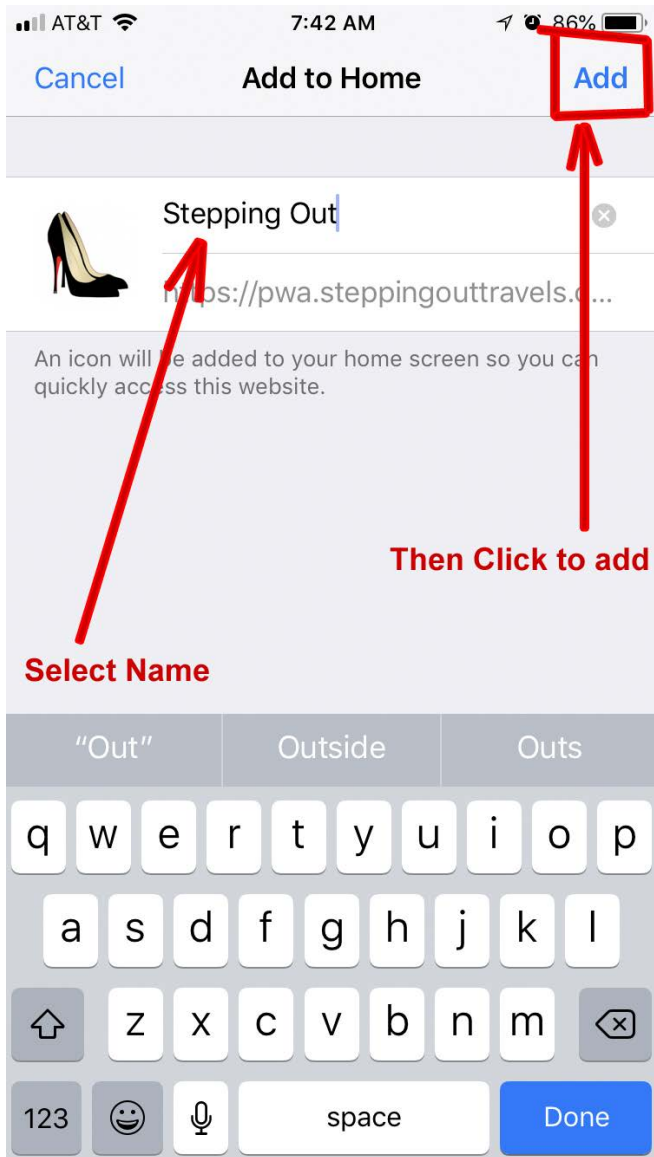

---

## Saving a Web App to Your Device

Though you don't download a Web App like a native app, you can easily save a shortcut to your device's home screen. It will look just like any native app on your home screen, though it's technically just a bookmarked website. This also does not require valuable space on your device.

On iOS Devices:

On Android devices (process may differ):
